

System Reliability Toolkit

A Practical Guide for Understanding and
Implementing a Program for System Reliability

RIAC

Reliability Information Analysis Center

DACS
Data Analysis Center for Software

RIAC and DACS are DoD Information Analysis Centers sponsored by the Defense Technical Information Center. The RIAC is operated by Wyle Laboratories, Quanterion Solutions, the University of Maryland, the Penn State University Applied Research Lab and the State University of New York Institute of Technology. The DACS is operated by ITT Industries.

Ordering No.: SRKIT

System Reliability Toolkit

Prepared by:

Reliability Information Analysis
Center
6000 Flanagan Rd.
Suite 3
Utica, NY 13502-1348

Prepared by:

Data and Analysis Center for
Software

Under Contract to:

Army Contracting Agency, ITEC4
ATTN: SFCA-IT-B
2461 Eisenhower Avenue
Alexandria, VA 22331

RIAC and DACS are DoD Information Analysis Centers sponsored by the Defense Technical Information Center. RIAC is operated by a team of Wyle Laboratories, Quanterion Solutions, the University of Maryland, the Penn State University Advanced Research Laboratory and the State University of New York Institute of Technology. DACS is operated by ITT Industries Advanced Engineering and Sciences (ITT/AES).

Approved for Public Release, Distribution Unlimited

TABLE OF CONTENTS

Section 1.0: The Need for Reliability	1
1.1: THE NEED FOR SYSTEM RELIABILITY	3
1.2: CUSTOMER EXPECTATIONS.....	5
1.3: MARKET COMPETITION	8
1.4: AVAILABILITY AND OPERATIONAL READINESS	13
1.5: LIFE CYCLE COSTS AND LCCA	19
1.6: LIABILITY	32
1.7: MILITARY NEEDS.....	36
1.8: WARRANTIES	42
Section 2.0: Systems Engineering and Reliability	53
2.1: THE SYSTEMS ENGINEERING PROCESS	55
2.1.1: <i>Identification of System Needs and Feasibility Analysis.....</i>	<i>63</i>
2.1.2: <i>System Operational Requirements.....</i>	<i>64</i>
2.1.3: <i>Functional Analysis and Allocation.....</i>	<i>66</i>
2.2: CONCEPTS RELATED TO SYSTEM R&M	72
2.2.1: <i>Logistics.....</i>	<i>74</i>
2.2.2: <i>Supportability.....</i>	<i>80</i>
2.3: RELIABILITY OVER THE SYSTEM LIFE CYCLE	81
2.4: OVERVIEW OF SOFTWARE RELIABILITY	87
2.4.1: <i>Software vs. Hardware Reliability.....</i>	<i>91</i>
2.5: HUMAN ENGINEERING	96
2.5.1: <i>Elements of a Human Engineering Program.....</i>	<i>99</i>
2.5.2: <i>Human Reliability Considerations for Systems</i>	<i>102</i>
Section 3.0: Reliability and Maintainability Basics.....	105
3.1: SYSTEM TECHNICAL PERFORMANCE MEASURES	107
3.2: RELIABILITY AND MAINTAINABILITY DEFINITIONS.....	111
3.3: THE BATHTUB CURVE	113
3.4: RELIABILITY AND MAINTAINABILITY FIGURES-OF-MERIT	114
3.4.1: <i>Operational Parameter Translation</i>	<i>121</i>
3.5: SOFTWARE QUALITY METRICS.....	124
3.6: HUMAN-MACHINE PERFORMANCE METRICS	127
3.6.1: <i>Human-Machine Reliability, Maintainability and Availability Metrics</i>	<i>128</i>
3.7: RELEVANT STATISTICAL CONCEPTS	130
3.7.1: <i>Probability Distributions</i>	<i>134</i>
3.7.1.1: <i>Binomial Distribution.....</i>	<i>139</i>
3.7.1.2: <i>Poisson Distribution.....</i>	<i>141</i>
3.7.1.3: <i>Normal Distribution</i>	<i>143</i>
3.7.1.4: <i>Exponential Distribution</i>	<i>145</i>
3.7.1.5: <i>Gamma Distribution.....</i>	<i>147</i>
3.7.1.6: <i>Weibull Distribution</i>	<i>150</i>
3.7.2: <i>Statistical Hypothesis Testing.....</i>	<i>154</i>
3.7.2.1: <i>Hypothesis Testing for Reliability Acceptance.....</i>	<i>162</i>
3.7.2.2: <i>Hypothesis Testing for Reliability Growth</i>	<i>165</i>
3.7.2.3: <i>Chi-Square Goodness-of-Fit Test</i>	<i>167</i>

3.7.2.4: Kolmogorov-Smirnov Goodness-of-Fit Test	170
3.7.3: <i>Parameter Estimation</i>	174
3.7.4: <i>Confidence Bounds</i>	179
Section 4.0: R&M Requirements and Programs	185
CUSTOMER REQUIREMENTS	
4.1: PERFORMANCE-BASED REQUIREMENTS.....	187
4.2: SPECIFICATION OF REQUIREMENTS FOR SYSTEM DESIGN	191
4.2.1: <i>Example R&M Requirements for a Supplier Specification or SOW</i>	193
4.3: QUANTITATIVE RELIABILITY REQUIREMENTS	199
4.4: QUANTITATIVE MAINTAINABILITY REQUIREMENTS	203
4.5: QUANTITATIVE TESTABILITY/DIAGNOSTIC REQUIREMENTS.....	204
4.6: R&M INFORMATION FOR PROPOSALS	207
4.6.1: <i>Source Selection and R&M Evaluation Criteria</i>	208
PROGRAM REQUIREMENTS	
4.7: PROGRAM MANAGEMENT AND CONTROL.....	212
4.8: PRODUCT DEVELOPMENT PHASE TERMINOLOGY	214
4.9: RELIABILITY PROGRAM ELEMENTS	215
4.10: R&M ACTIVITY PRIORITIES	220
4.10.1: <i>Human Engineering Relationship to Reliability</i>	221
4.11: NONDEVELOPMENTAL ITEM (NDI) CONSIDERATIONS.....	223
4.11.1: <i>Issues in COTS Hardware/Software Reliability</i>	227
Section 5.0: Design.....	233
5.1: PART RELIABILITY CONSIDERATIONS	
5.1.1: <i>Parts Selection, Application and Control</i>	235
5.1.1.1: <i>Special Part Considerations</i>	242
5.1.2: <i>Part Stress Derating</i>	248
5.1.3: <i>Part Failure Modes/Mechanisms</i>	250
5.2: ASSEMBLY RELIABILITY CONSIDERATIONS	
5.2.1: <i>Thermal Management</i>	255
5.2.2: <i>Interconnection Techniques</i>	257
5.2.3: <i>Power Supply Design Checklist</i>	261
5.2.4: <i>Testability Criteria (Assembly Level)</i>	263
5.3: SYSTEM/EQUIPMENT RELIABILITY CONSIDERATIONS	
5.3.1: <i>The System Design Process</i>	266
5.3.2: <i>Benchmarking</i>	269
5.3.3: <i>System/Equipment Reviews</i>	272
5.3.3.1: <i>Human Engineering Design Reviews</i>	276
5.3.4: <i>Design for Reliability</i>	278
5.3.5: <i>System Fault Tolerance Techniques</i>	280
5.3.5.1: <i>Software Fault Tolerance Techniques</i>	283
5.3.6: <i>Environmental Characterization</i>	288
5.3.7: <i>Critical Item Reliability</i>	292
5.3.8: <i>Testability and Diagnostics</i>	293
5.3.8.1: <i>Testability Criteria (System Level)</i>	297
5.3.9: <i>System Electromagnetic Guidelines</i>	299
5.3.10: <i>Unique Considerations for Dormancy</i>	301
5.3.11: <i>Mechanical Systems</i>	304

5.3.12: <i>Software Reliability Design & Development</i>	310
5.3.12.1: Waterfall Model	317
5.3.12.2: Prototyping and Rapid Prototyping Models	319
5.3.12.3: Spiral and WIN-WIN Models	322
5.3.12.4: Software Reuse	325
5.3.12.5: Software Inspection	329
5.3.12.6: Concurrent Hardware/Software Development	333
5.3.13: <i>Design for Human Factors</i>	336
5.3.13.1: Anthropometric Factors	338
5.3.13.2: Sensory Factors	340
5.3.13.3: Strength and Endurance Factors	342
5.3.13.4: Speed and Accuracy Factors	344
5.3.13.5: Body Movement Factors	345
5.3.13.6: Physiological Factors	346
5.3.13.7: Human Engineering Design Tools & Methods	353
5.3.13.8: Designing for Human Reliability	356
5.3.13.9: Reliable Human Performance	363
5.3.13.10: Factors Affecting Human Performance	365
5.3.13.11: Time and Human Performance Factors	368
5.3.14: <i>Design for Maintainability</i>	372
5.3.14.1: System Maintainability Concepts	374
5.3.14.2: System Maintainability Considerations	376
5.3.14.3: System Interfaces and Connections	382
Section 6.0: Analysis	385
6.1: TYPES OF RELIABILITY ANALYSES	387
6.2: RELIABILITY MODELING	
6.2.1: <i>Hardware Reliability Modeling</i>	389
6.2.2: <i>Software Reliability Modeling</i>	396
6.2.2.1: Time Domain Models	400
6.2.2.2: Fault Seeding Model	407
6.2.2.3: Input Domain Models	409
6.2.3: <i>Human Reliability Modeling</i>	411
6.3: ALLOCATION OF RELIABILITY REQUIREMENTS	414
6.3.1: <i>Allocation of Hardware Reliability Requirements</i>	415
6.3.2: <i>Allocation of Software Reliability Requirements</i>	421
6.3.2.1: Allocation by Sequential Execution	424
6.3.2.2: Allocation by Concurrent Execution	425
6.3.2.3: Allocation by Operational Profile	426
6.3.2.4: Allocation by Complexity Factors	429
6.3.2.5: Allocation by Operational Criticality	431
6.3.3: <i>Allocation of Human Reliability Requirements</i>	433
6.4: RELIABILITY PREDICTION	
6.4.1: <i>Hardware Reliability Prediction</i>	437
6.4.1.1: Reliability Physics	441
6.4.1.2: Reliability of Surface Mount Technology (SMT)	444
6.4.1.3: Parts Count Reliability Prediction	449
6.4.1.4: Reliability Adjustment Factors	461
6.4.1.5: Reliability Prediction of Dormant Items	463

6.4.1.6: Reliability Prediction of Mechanical Components	464
6.4.1.7: Reliability Prediction Checklist	473
6.4.2: <i>Software Reliability Prediction/Estimation Overview</i>	474
6.4.2.1: Software Reliability Prediction	480
6.4.2.2: Software Fault Estimation Using Tagging	482
6.4.2.3: Prequential Likelihood Ratio	484
6.4.2.4: Assessing Software Reliability Model Performance	486
6.4.3: <i>Predicting Human Reliability</i>	491
6.5: DATA COLLECTION AND ANALYSIS	498
6.5.1: <i>Overview of Data Collection and Analysis</i>	498
6.5.2: <i>Types and Sources of Data</i>	513
6.5.3: <i>Use of Existing Reliability Data</i>	516
6.5.4: <i>Human Reliability Data Sources</i>	517
6.5.5: <i>Data Analysis Techniques</i>	520
6.5.5.1: Weibull Analysis	525
6.5.5.2: Regression Analysis	532
6.5.5.3: Analysis of Variance	538
6.6: RELIABILITY ANALYSIS TECHNIQUES	542
6.6.1: <i>Failure Modes, Effects and Criticality Analysis (FMECA)</i>	543
6.6.2: <i>Fault Tree Analysis (FTA)</i>	554
6.6.3: <i>Worst Case Analysis</i>	567
6.6.4: <i>Sneak Analysis</i>	573
6.6.4.1: Sneak Circuit Analysis	577
6.6.4.2: Software Sneak Analysis	579
6.6.5: <i>Durability Analysis</i>	584
6.6.6: <i>Finite Element Analysis</i>	588
6.6.7: <i>Safety Analysis</i>	590
6.6.7.1: Overview of Safety Analysis	590
6.6.7.2: Software Safety Analysis	594
6.6.8: <i>Thermal Analysis</i>	601
6.6.9: <i>Electromagnetic Analysis</i>	605
6.6.10: <i>Human Factors Analysis</i>	608
6.6.11: <i>Maintainability/Testability Analysis</i>	609
6.6.11.1: Maintainability Analysis	609
6.6.11.2: Testability Analysis	610
6.6.11.3: Maintainability/Testability Analysis Checklist	611
6.6.12: <i>Reliability-Centered Maintenance</i>	612
Section 7.0: Testing	621
7.1: SYSTEM TEST REQUIREMENTS	623
7.2: RELIABILITY TESTING	627
7.2.1: <i>Reliability Test Strategies</i>	628
7.2.2: <i>Software Reliability Test Strategies</i>	632
7.3: DESIGN OF EXPERIMENTS (DOE)	636
7.4: ACCELERATED AND HIGHLY ACCELERATED TESTING	646
7.4.1: <i>Acceleration Factors Used in Life Models</i>	649
7.4.2: <i>Accelerated Life Testing</i>	656
7.4.3: <i>Highly Accelerated Testing</i>	665
7.4.3.1: Step-Stress Testing	669

7.4.3.2: Highly Accelerated Life Test (HALT).....	671
7.5: RELIABILITY GROWTH AND RELIABILITY DEMO/QUAL TESTING	673
7.5.1: <i>Reliability Growth Testing</i>	675
7.5.1.1: <i>Software Reliability Growth Testing</i>	680
7.5.2: <i>Reliability Demonstration/Qualification Testing</i>	684
7.6: RELIABILITY SCREENING.....	699
7.6.1: <i>Environmental Stress Screening (ESS)</i>	704
7.7: ELECTROMAGNETIC TESTING	708
7.8: SOFTWARE RELIABILITY TESTING.....	710
7.8.1: <i>Software Test Coverage Metrics</i>	713
7.8.2: <i>Software Statistical Usage Testing</i>	717
7.8.3: <i>Operational Profile Testing</i>	725
7.8.4: <i>Markov Testing</i>	731
7.9: HUMAN FACTORS TEST AND EVALUATION.....	736
7.9.1: <i>Human Engineering Test and Evaluation Activities</i>	738
7.9.2: <i>Testing for Human Reliability</i>	740
7.10: MAINTAINABILITY/TESTABILITY TEST STRATEGIES	744
7.10.1: <i>Maintainability/Testability Demonstration Testing</i>	752
7.11: FAILURE REPORTING, ANALYSIS AND CORRECTIVE ACTION SYSTEM	756
7.11.1: <i>Root Cause Failure Analysis</i>	766
Section 8.0: Production and Beyond.....	773
8.1: STATISTICAL PROCESS CONTROL AND SIX-SIGMA.....	775
8.2: CONTINUOUS IMPROVEMENT	787
8.3: LIFETIME EXTENSION ASSESSMENT	796
APPENDIX A: Example Hardware Reliability Design Guidelines	803
APPENDIX B: R&M Standardization Documents	813
APPENDIX C: Reliability and Maintainability Education Sources ..	829
APPENDIX D: Acronyms.....	833
